Colour Legend

- No clinically significant interaction expected.
- These drugs should not be coadministered.
- Potential interaction which may require a dosage adjustment or close monitoring.
- Potential interaction predicted to be of weak intensity. Additional action/monitoring or dosage adjustment is unlikely to be required.

Text Legend

- ↑ Potential increased exposure of the anxiolytic/hypnotic
- ↓ Potential decreased exposure of the anxiolytic/hypnotic
- ↔ No significant effect

a Initial inhibitory effect followed by inductive effect in presence of ritonavir. Start alprazolam at a lower dose and increase if needed.

b Contraindicated by manufacturer.
