

Interactions with Protease Inhibitors

Please note that if a drug is not listed it cannot automatically be assumed it is safe to coadminister.

Table containing drug interaction charts for Contraceptives/HRT, Erectile Dysfunctional Agents, Gastrointestinal Agents, and Herbal/Supplements/Vitamins. Columns represent different protease inhibitors (ATV, ATV/c, etc.).

Table containing drug interaction charts for Herbal/Supplements/Vitamins (continued), Hypertension / Heart Failure Agents, and Herbal/Supplements/Vitamins. Columns represent different protease inhibitors (ATV, ATV/c, etc.).

For personal use only. Not for distribution.

Key to abbreviations

Table defining abbreviations for Protease Inhibitors: ATV, ATV/c, ATV/r, DRV/c, SYM, DRV/r, FPV, IDV, LPV, RTV, SQV, TPV.

Key to symbols

Table defining symbols for interaction severity: Red circle (not coadministered), Orange square (potential interaction), Yellow triangle (potential interaction likely to be weak), Green diamond (no clinically significant interaction).

Where advice differs between countries, and/or between boosted and unboosted regimens, the charts reflect the more cautious option.
